

1. Record Nr.	UNINA9910455895603321
Titolo	Chemiluminescence and bioluminescence [[electronic resource]] : past, present and future // edited by Aldo Roda
Pubbl/distr/stampa	Cambridg, U.K., : Royal Society of Chemistry, c2011
ISBN	1-84973-202-7
Descrizione fisica	1 online resource (609 p.)
Altri autori (Persone)	RodaA (Aldo)
Disciplina	572.4358
Soggetti	Chemiluminescence Bioluminescence Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Note continued: 14.1.Introduction -- 14.2.Chemiluminescence -- 14.2.1.Reaction Triggering -- 14.3.Bioluminescence -- 14.3.1.Firefly Bioluminescence -- 14.3.2.Bacterial Bioluminescence -- 14.4. Biosensors Generalities -- 14.5.Immunosensor Generalities -- 14.6. Analytical Applications -- 14.6.1.Chemiluminescent Biosensors -- 14.6.2.Electrochemiluminescent Biosensors -- 14.6.3. Chemiluminescent Immunosensors -- 14.6.4.Electrochemiluminescent Immunosensors -- 14.6.5.Electrochemiluminescent DNA Sensors -- 14.6.6.Bioluminescent Biosensors -- 14.7.Conclusion -- References -- ch. 15 Cell-based Bioluminescent Biosensors / Aldo Roda -- 15.1. Introduction -- 15.2.Design and Construction of Bacterial Cell-based Bioluminescent Biosensors -- 15.2.1.Regulation of Reporter Gene Expression -- 15.2.2.Reporter Genes and Their Attributes -- 15.2.3. Advantages and Limitations of Bacterial Cell-based Bioluminescent Biosensors -- 15.3.Applications of Bacterial Cell-based Bioluminescent Biosensing Systems -- 15.4.Bioluminescent Biosensors: the Eukaryotic Alternative -- 15.4.1.Yeast-based Biosensors -- 15.4.2.Bioluminescent Cell-based Assays for Endocrine Disruptors Monitoring -- 15.4.3. Bioluminescent Yeast and Mammalian Cell-based Assays for Genotoxic Compounds and ADMET Studies -- 15.4.4.Bioluminescent Mammalian Cell-based Biosensors as Functional Detection Systems -- 15.5. Multiplexed and Multicolor Assays -- 15.6.Miniaturization of Cell-

based Biosensing Systems -- 15.7.Conclusions and Future Potential -- Acknowledgements -- References -- ch. 16 Miniaturized Analytical Devices Based on Chemiluminescence, Bioluminescence and Electrochemiluminescence / Jason Y. Park -- 16.1.Introduction -- 16.2. Fabrication Methods for Microchips -- 16.3.Microchip Components -- 16.4.Advantages of Microchips for Analysis -- 16.5.Applications of Microchip Analytical Devices -- 16.5.1.Chemiluminescence -- 16.5.2. Bioluminescence -- 16.5.3.Electrochemiluminescence -- 16.6.μTAS Chips -- 16.7.Microarray Chips -- 16.8.Flow Injection Analysis (FIA) on Microchips -- 16.9.Capillary Electrophoretic Analysis (CE) on Microchips -- 16.10.Point-of-care Applications for Microchips -- 16.11.Conclusions -- References -- ch. 17 Recent Analytical Application Areas of Chemiluminescence and Bioluminescence / Aldo Roda -- 17.1.Introduction -- 17.2.Forensic Sciences -- 17.2.1.Luminol Test for Bloodstain Detection -- 17.2.2.Factors Affecting the Luminol Test -- 17.2.3.Improvement of the Luminol Test -- 17.2.4.Other Applications of the Luminol Test -- 17.3.Detection of Explosives -- 17.3.1.Analysers Based on the NO-Ozone CL Reaction -- 17.3.2. Analysers Based on the Luminol CL Reaction -- 17.3.3.Direct Detection of Degradation Products of Nitrated Explosives -- 17.3.4.Detection of Explosives by Gas Chromatography -- 17.3.5.Detection of Explosives by Liquid Chromatography -- 17.3.6.Detection of Explosives by Immunoassays -- 17.4.Study and Conservation of Cultural Heritage -- 17.4.1.Detection of Microbial Contamination by BL Imaging -- 17.4.2. Detection and Localization of Proteins in Artworks by CL Imaging Microscopy -- 17.4.3.Dating of Ancient Bones -- References.

Sommario/riassunto

This complete and well-organized overview of chemiluminescence and bioluminescence is divided into two parts. The first covers historical developments and the fundamental principles of these phenomena before going on to review recent advances and instrumentation. The second part deals with the applications in a variety of research fields including life sciences, drug discovery, diagnostics, environment, agrofood, and forensics. The book is suitable not only for researchers currently employing detection techniques in their research activity, but also for those approaching the subject for the fi
