

1. Record Nr.	UNINA9910455928103321
Autore	MacKinnon Michael
Titolo	The excavations of San Giovanni di Ruoti . Volume 3. : the faunal and plant remains / / Michael MacKinnon
Pubbl/distr/stampa	Toronto, [Ontario] ; ; Buffalo, [New York] ; ; London, [England] : , : University of Toronto Press, , 2002 ©2002
ISBN	1-282-03391-3 9786612033919 1-4426-8123-3
Descrizione fisica	1 online resource (291 p.)
Collana	Phoenix Supplementary Volumes
Disciplina	937.7
Soggetti	Country homes - Italy - San Giovanni di Ruoti Site Excavations (Archaeology) - Italy - San Giovanni di Ruoti Site Electronic books. San Giovanni di Ruoti Site (Italy)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Illustrations -- Tables -- Figures -- Preface -- Abbreviations -- 1. The Animal Bones / MacKinnon, M.R. -- Appendix 1. Measurements of mammalian bones and teeth, arranged by taxon, part of skeleton, and period / phase -- Appendix 2. M3 measurements from domestic and wild pigs from various archaeological sites -- Appendix 3. Scientific nomenclature of mammalian taxa listed in this report -- Appendix 4. A human foetus from a midden of Period 3B / Steele, D.G. / MacKinnon, M.R. -- 2. The Avian Remains / Eastham, A. -- 3. Marine and Freshwater Shells / Reese, D.S. -- 4. Land Snails / MacKinnon, M.R. -- 5. Plant Remains / Monckton, S.G. -- Bibliography -- Illustrations -- Indexes -- Phoenix Supplementary Volumes
Sommario/riassunto	This third volume of The Excavations of San Giovanni di Ruoti series deals with the social, economic, and environmental information derived from the analysis of zooarchaeological and palaeobotanical remains found at the fourth-century A.D. Italian villa of San Giovanni di Ruoti.

The four contributors use the large collection of organic evidence obtained from the site, including mammal and bird bones, shells, land snails, and plant remains, to provide information on diet, food preparation, economics, trade routes, taxation, local environment and climate, agricultural economy, and animal husbandry. With both technical analysis and an interpretive component, the contributors offer various reconstructions of Roman life, often in combination with citations from ancient literary sources, allowing this work to appeal to both the specialist and layperson alike. Written with a thoroughness and attention to detail not often seen in zooarchaeological work, this analysis represents an important advance in the study of faunal and botanical data in Roman archaeology in Italy, and will be an invaluable resource for all environmental and classical archaeologists.
