	Sommario/riassunto	This volume looks at the introduction, adoption, and utilization of ICTs at the community level. In various contexts - geographical, technological, socioeconomic, cultural, and institutional - the book explores the questions of community participation. It looks at how communities in sub-Saharan Africa have reacted to the changes

brought about by the introduction of these new ICTs and, in detail, presents both the opportunities and the challenges that ICTs present for community development.
