Sommario/riassunto	Understanding ASPs: The new Internet business.Application Service Providers (ASPs) appeal to small businesses by offering a wide variety of web-hosted software programs including e-commerce, communications, project management, financial, word processing and human resource applications. ASPs offer inexpensive use of software and the ability to share access among people in different locations. There is a huge buzz in the computing industry about ASPs and many

ISPs (Internet Service Providers) are gearing up to become ASPs. These companies are in need of a guide - this is the fir
