

1. Record Nr.	UNINA9910456149903321
Autore	Reilly Philip <1947->
Titolo	Abraham Lincoln's DNA and other adventures in genetics [[electronic resource] /] / Philip R. Reilly
Pubbl/distr/stampa	Cold Spring Harbor, NY, : Cold Spring Harbor Laboratory Press, c2000
ISBN	0-87969-659-1
Descrizione fisica	1 online resource (359 p.)
Disciplina	599.93/5
Soggetti	Human genetics Medical genetics Genetic engineering Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 317-330) and index.

2. Record Nr.	UNINA9910971455403321
Autore	Rauschenbakh Boris V
Titolo	Essential spaceflight dynamics and magnetospherics // by Boris V. Rauschenbakh, Michael Yu. Ovchinnikov, Susan McKenna-Lawlor
Pubbl/distr/stampa	Dordrecht ; ; Boston, : Kluwer Academic Publishers, c2003
ISBN	0-306-48027-1
Edizione	[1st ed. 2003.]
Descrizione fisica	1 online resource (XIV, 397 p.)
Collana	Space technology library ; ; 15
Altri autori (Persone)	OvchinnikovM. IU McKenna-LawlorSusan M. P
Disciplina	629.4/11
Soggetti	Astrodynamics Magnetosphere
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (p. 299-301) and index.
Nota di contenuto	Unperturbed Orbital Motion. Two-Body Problem -- Qualitative Analysis of the Properties of Orbits -- Perturbed Motion -- Gravispheres -- Equations of Motion in Terms of Osculating Elements -- Braking of a SC in the Earth's Atmosphere -- Terrestrial Nonsphericity and SC Motion -- SC Motion in the Field of Two Attracting Centers -- Elements of SC Manoeuvring Theory -- Interplanetary Trajectory Corrections -- Rendezvous Manoeuvring -- Gravity-Assist Manoeuvre -- About Orbit Determination Using Measured Data -- to Attitude Control -- SC Affected by a Gravity-Gradient Torque -- SC Motion in a Circular Orbit -- SC Motion in an Elliptical Orbit -- A Spinning Axisymmetric SC in Circular Orbit -- Equilibrium of a Gyrostat -- SC Motion Affected by an Aerodynamic Torque -- SC Motion in the Geomagnetic Field -- Motion of a SC under Damping.
Sommario/riassunto	Essential Spaceflight Dynamics and Magnetospherics describes, in the first instance, some of the key aspects of celestial mechanics and spaceflight dynamics. It begins with classical two and three body problems illustrative of the aesthetic aspects of applying analytical methods of investigation to celestial mechanics. Then, osculating orbital elements are introduced as well as analysis techniques sufficient to evaluate the influence of various disturbing forces on spacecraft. Next a theory of manoeuvres is outlined and the methodology of

making interplanetary trajectory corrections. Ideas involving various approaches to orbital element determinations using measured data are also considered. The forces applied to a spacecraft can result in the development of torques that influence attitude motion and the effects of the most important of these are described in terms of equilibrium positions, periodic motions, steady-state and transient motions. Also considered is the problem of attitude control of a spacecraft using active and/or passive methods of orientation and stabilization. In addition, a more advanced treatment of the development of attitude control systems is provided.
