| Titolo | Automated database applications testing [[electronic resource]] : specification representation for automated reasoning // Rana Farid Mikhail, Donald Berndt & Abraham Kandel |
| Pubbl/distr/stampa | Singapore ; ; Hackensack, NJ, : World Scientific, c2010 |
| ISBN | 1-282-75747-4 9786612757471 981-283-729-9 |
| Descrizione fisica | 1 online resource (212 p.) |
| Collana | Series in machine perception and artificial intelligence ; ; v. 76 |
| Altri autori (Persone) | BerndtDonald J KandelAbraham |
| Disciplina | 005.1/4 |
| Soggetti | Computer software - Testing - Automation Database design Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references (p. 185-192) and index. |
| Nota di contenuto | Preface; Acknowledgments; Contents; 1. Introduction; 2. SpecDB: A Database Design for Software Specifications; 3. Representing Formal Specifications in SpecDB: A Translation Algorithm; 4. An Automated Constraint Generator; 5. A Reverse Engineering Testing Tool; 6. Enhancing Other Testing Tools Using SpecDB; 7. Conclusion and Future Work; Appendix A SQL Scripts for SpecDB Constraints; Appendix B PL/SQL Constraint Generator Code; Bibliography; Index |
| Sommario/riassunto | This book introduces SpecDB, an intelligent database created to represent and host software specifications in a machine-readable format, based on the principles of artificial intelligence and unit testing database operations. SpecDB is demonstrated via two automated intelligent tools. The first automatically generates database constraints from a rule-base in SpecDB. The second is a reverse engineering tool that logs the actual execution of the program from the code. |
