Sommario/riassunto	Quebec's referendum on sovereignty dominated politics and public affairs in Canada in 1995. While it seemed like everything else was eclipsed in importance, many other matters of consequence occurred.

The economy was generally in a state of recovery, but there was not as much new employment as hoped. Governments at the federal and provincial level continued to grapple with budget deficits. Controversial new gun control legislation was introduced. Trade and peacekeeping dominated the foreign and defence policy agendas, with public confidence in peacekeeping and the Canadian military eroded by the ongoing Somalia affair. Featuring essays on Parliament and politics, Ottawa and the provinces, external affairs and defence, the Canadian Annual Review of Politics and Public Affairs provides a comprehensive account of the year's events. The Canadian Annual Review has long been praised for its excellence. Known for its accuracy, readability, and insight, it offers a synoptic appraisal of the year's crises, controversies, and developments from both federal and provincial perspectives.
