Rehman -- Kenhat, The Dialects Of Upper Ladakh And Zanskar / Bettina Zeisler -- Index / M. Turin and B. Zeisler. |
| Sommario/riassunto      | Himalayan Languages and Linguistics gathers together nine outstanding and original contributions on the Tibeto-Burman and  |

Indo-Aryan languages of this important and culturally diverse mountainous area. Filling a marked gap in our understanding of the languages of this underdocumented region, the collection offers a snapshot of the state of the field of Himalayan language research and linguistic comparison. Drawing on primary fieldwork in China, India, Nepal and Pakistan, as well as on comparative sources, the new analyses outlined in these contributions will interest a readership of linguists, philologists, anthropologists, historians, lexicographers and specialists in the languages and cultures of Inner and South Asia. Contributions cover topics as diverse as linguistic palaeontology, orthographical standardisation, dialectology, phonology, morphology, semantics and syntax.
