

1. Record Nr.	UNINA9910456277103321
Autore	Thompson Michael
Titolo	Notes on Statistics and Data Quality for Analytical Chemists [[electronic resource]]
Pubbl/distr/stampa	Singapore, : World Scientific Publishing Company, 2011
ISBN	1-283-14822-6 9786613148223 1-84816-618-4
Descrizione fisica	1 online resource (260 p.)
Altri autori (Persone)	LowthianPhilip James
Disciplina	543.015195
Soggetti	Chemistry, Analytic -- Data processing Chemistry, Analytic -- Quality Chemometrics Chemistry Physical Sciences & Mathematics Analytical Chemistry Crystallography Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Preface; Contents; Part 1: Statistics; 1. Preliminaries; 2. Thinking about Probabilities and Distributions; 3. Simple Tests of Significance; 4. Analysis of Variance (ANOVA) and Its Applications; 5. Regression and Calibration; 6. Regression - More Complex Aspects; 7. Additional Statistical Topics; Part 2: Data Quality in Analytical Measurement; 8. Quality in Chemical Measurement; 9. Statistical Methods Involved in Validation; 10. Internal Quality Control; 11. Proficiency Testing; 12. Sampling in Chemical Measurement; Index
Sommario/riassunto	The book is intended to help analytical chemists feel comfortable with the commonly used statistical operations and make effective use of the results. The emphasis is on computer-based methods that are applied in relation to measurement and the quality of the resulting data. The book is intended for analytical chemists working in industry but is at

the level required for students taking first degrees or an MSc in analytical chemistry. The book is divided into quite short sections, each dealing with a single topic. The sections are as far as possible self-contained, but are extensively cross-re
