

1. Record Nr.	UNINA9910456318503321
Titolo	Mechanical reperfusion for STEMI : from randomized trials to clinical practice // edited by Giuseppe De Luca, Alexandra Lansky
Pubbl/distr/stampa	New York : , : Informa Healthcare, , 2010
ISBN	0-429-06600-7 1-282-56095-6 9786612560958 1-84184-746-1
Descrizione fisica	1 online resource (310 p.)
Altri autori (Persone)	De LucaGiuseppe <1974-> LanskyAlexandra
Disciplina	616.1/24
Soggetti	Myocardial infarction - Treatment Myocardial reperfusion Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Foreword; Preface; Contents; Chapter 1. Primary Angioplasty Vs. Fibrinolysis: An Overview of Randomized Trials and Registry Data; Chapter 2. Which Patients Should Be Transferred for Primary PCI?; Chapter 3. Pharmacological Facilitation in Primary Angioplasty: Myth or Reality? ; Chapter 4. How to Organize Networks for Invasive Treatment of STEMI: Krakow Experience; Chapter 4a. How to Organize Networks for Invasive Treatment of STEMI: Krakow Experience; Chapter 4b. How to Organize Networks for INvasive Treatment of STEMI: The Zwolle Experience Chapter 4c. How to Organize Networks for Invasive Treatment of STEMI: Link oping ExperienceChapter 4d. How to Organize Networks for Invasive Treatment of STEMI: Experience in the United States; Chapter 4e. How to Organize Networks for Invasive Treatment of STEMI: Experience in Asia; Chapter 5: Failed Thrombolysis: Rescue Angioplasty or Conservative Therapy?; Chapter6. Primary PCI in Cardiogenic Shock and Out-of-Hospital Cardiac Arrest; Chapter 7. Oral Antiplatelet Therapy; Chapter 8. Glycoprotein IIb/IIIa Inhibitors; Chapter 9.

Anticoagulation Therapy; Chapter 10. Balloon Angioplasty or BMS? Chapter 11. Drug-Eluting Stent: Weighing Costs and Benefits Chapter 12. Mechanical Prevention of Distal Embolization; Chapter 13. Distal Protection Devices: Tips and Tricks; Chapter 14. Thrombectomy Devices: Tips and Tricks; Chapter 15. Proximal Devices: Tips and Tricks; Chapter 16. Hemodynamic Support in High-Risk Patients; Chapter 17. Limitation of Infarct Size: Adjunctive Mechanical Devices; Chapter 18. Transradial Access for Primary PCI: Advantages beyond any Doubt; Chapter 19. Intravascular Imaging: IVUS, OCT, and Angioscopy Chapter 20. Redefining the Success of Mechanical Reperfusion: ST-Segment Resolution Chapter 21. Redefining the Success of Mechanical Reperfusion: TIMI Flow and Myocardial Blush; Chapter 22. Redefining the Success of Mechanical Reperfusion: Doppler Flow-Wire; Chapter 23. Redefining the Success of Mechanical Reperfusion: Cardiac MRI; Chapter 24. Redefining the Success of Mechanical Reperfusion: Contrast Echocardiography; Chapter 25. Redefining the Success of Mechanical Reperfusion Chapter 26. Bleeding Complications in Patients Undergoing Percutaneous Coronary Intervention: Prognostic Implications and Prevention Chapter 27. Contrast-Induced Nephropathy in Patients Undergoing Primary Angioplasty: Prognostic Implications, Prevention, and Management; Chapter 28. Myocardial Regeneration: Cell-Therapy After Reperfusion in Patients with ST-Elevation Myocardial Infarction; Chapter 29. Early Discharge After Primary PCI; Chapter 30. ACC/AHA and ESC Guidelines; Index; Back Cover

---

Sommario/riassunto

<P>As a leading cause of death in developed countries, ST-segment elevation myocardial infarction and its various treatment options are of great concern to those in the cardiology field. This text presents evidence-based chapters that supply clinicians with real-life situations and strategies to treat STEMI patients more effectively and at a quicker pace. A highly illustrated and fully referenced source, this comprehensive text provides both a scientific background and a practical overview of the invasive management of STEMI patients. </P>
