

1. Record Nr.	UNINA9910456392603321
Autore	Burnett Mark (Mark M.)
Titolo	Hacking the code [[electronic resource]] : ASP. NET web application security // Mark M. Burnett; James C. Foster
Pubbl/distr/stampa	Rockland, MA, : Syngress, 2004
ISBN	1-281-05628-6 9781931836434 9786611056285 0-08-047817-4
Edizione	[1st edition]
Descrizione fisica	1 online resource (473 p.)
Altri autori (Persone)	FosterJames C
Disciplina	005.8
Soggetti	Computer networks - Security measures Computer security Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Cover; Contents; Chapter 1 Managing Users; Chapter 2 Authenticating and Authorizing Users; Chapter 3 Managing Sessions; Chapter 4 Encrypting Private Data; Chapter 5 Filtering User Input; Chapter 6 Accessing Data; Chapter 7 Developing Secure ASP.NET Applications; Chapter 8 Securing XML; Appendix A Understanding .NET Security; Appendix B Glossary of Web Application Security Threats; Related
Sommario/riassunto	Hacker Code will have over 400 pages of dedicated exploit, vulnerability, and tool code with corresponding instruction. Unlike other security and programming books that dedicate hundreds of pages to architecture and theory based flaws and exploits, HC1 will dive right into deep code analysis. Previously undisclosed security research in combination with superior programming techniques from Foundstone and other respected organizations will be included in both the Local and Remote Code sections of the book. The book will be accompanied with a FREE COMPANION CD containing both commented
