Sommario/riassunto	This report addresses the core components of enterprise activity, namely, the factors of production and the public infrastructure to support them. In the period just before the financial crisis, a number of elements, such as access to finance, skills and education of labor, and infrastructure emerged as important obstacles to enterprise growth. The aggregate level of enterprise activity and its productivity largely depend on the availability and quality of these components. The relative importance of these obstacles has evolved over time, reflecting structural reforms and progress in improving
