Sommario/riassunto	One hundred years after the Berlin Psychoanalytic Institute was established, this book recovers the cultural and intellectual history connected to this vibrant organization and places it alongside the London Bloomsbury group, the Paris Surrealist circle, and the Viennese fin-de-siècle as a crucial chapter in the history of modernism. Taking

us from World War I Berlin to the Third Reich and beyond to 1940's Palestine and 1950's New York-and to the influential work of the Frankfurt School-Veronika Fuechtner traces the network of artists and psychoanalysts that began in Germany and continued in exile. Connecting movements, forms, and themes such as Dada, multi-perspectivity, and the urban experience with the theory and practice of psychoanalysis, she illuminates themes distinctive to the Berlin psychoanalytic context such as war trauma, masculinity and femininity, race and anti-Semitism, and the cultural avant-garde. In particular, she explores the lives and works of Alfred Döblin, Max Eitingon, Georg Groddeck, Karen Horney, Richard Huelsenbeck, Count Hermann von Keyserling, Ernst Simmel, and Arnold Zweig.

2. Record Nr.	UNINA9910139744903321
Titolo	Water and sanitation related diseases and the environment [[electronic resource]] : challenges, interventions, and preventive measures / / edited by Janine M. Selendy

section 8. Conclusion.

Sommario/riassunto

Written by authorities from various related specialties, this book presents the most complete treatment possible of the conditions responsible for water- and sanitation-related diseases, the pathogens and their biology, morbidity and mortality resulting from lack of safe water and sanitation, distribution of these diseases, and the conditions that must be met to reduce or eradicate them. Preventive measures and solutions are presented throughout. This book is an essential resource for all graduate students, postdoctoral scholars, and professionals in infectious disease, public health and medicine.
