#### Sommario/riassunto

---

Contemporary psychiatry is a field that is especially conducive to the principles of integrative medicine. With the exception of a few disorders, such as schizophrenia, most psychiatric disorders respond to interventions other than drugs. Patients who have not tolerated or not responded optimally to traditional treatments are also good candidates for integrative treatments. Additionally, herbals such as St. John's wort for the treatment of depression and ginkgo for the treatment of memory impairment in dementia have been found effective in traditional clinical trials. Patients' use of alternat
