Sommario/riassunto

The State of the Environment in Asia 2006/2007 is the fourth in a series of publications on Asia's environmental landscape. Originally published in Japanese as Ajia Kankyo Hakusho 2006/2007, this English-translated edition serves as an indispensable source of information on the Asian environment and offers pertinent commentaries on such wide-ranging issues as public health, water supply, sanitation, wildlife trade, renewable energy, CDM projects, and environmental laws and treaties. Four important messages emerge from this volume, namely that environmental problems are expected to become more s
