Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Originally published: Byggekologi. Stockholm: Svensk byggtjeanst, Note generali 2004. Includes bibliographical references and index. Nota di bibliografia Nota di contenuto Contents; Introduction; Chapter 1 Healthy Buildings; Chapter 2 Conservation: Chapter 3 Ecocycles: Chapter 4 Place: Bibliography: Index The Whole Building Handbook is a compendium of all the issues and Sommario/riassunto strategies that architects need to understand to design and construct sustainable buildings for a sustainable society. The authors move beyond the current definition of sustainability in architecture, which tends to focus on energy-efficiency, to include guidance for architecture that promotes social cohesion, personal health, renewable energy sources, water and waste recycling systems, permaculture,

energy conservation - and crucially, buildings in relation to their place.

The authors offer a holistic approach to sustainable ar
