| Sommario/riassunto      | Vaeakau-Taumako, also known as Pileni, is a Polynesian Outlier<br>language spoken in the Reef and Duff Islands in the Solomon Islands'<br>Temotu Province. This is an area of great linguistic diversity and long-<br>standing language contact which has had far-reaching effects on the<br>linguistic situation. Historically, speakers of Vaeakau-Taumako were<br>shipbuilders and navigators who made trade voyages throughout the  |

1.

area, bringing them into constant contact with speakers of the Reefs-Santa Cruz, Utupua and Vanikoro languages. The latter languages are only distantly related to Vaeakau-Taumako, making up an only recently identified first-order subgroup of Oceanic. Polynesian speakers first arrived in the area some 700-1000 years ago from the core Polynesian areas to the east. While today most intra-group communication takes place in Solomon Islands Pijin, traditionally the situation was one of extensive multilingualism, and this has left profound traces in the grammar of Vaeakau-Taumako, which shows a number of structural properties not known from other Polynesian languages. A Grammar of Vaeakau-Taumako is the most comprehensive grammar of any Polynesian Outlier to date, and the first full-length grammar of any language of Temotu Province. Based on extensive fieldwork, it is structured as a reference grammar dealing with all aspects of language structure, from phonology to discourse organization, and including a selection of glossed texts. It will be of interest to typologists, Oceanic linguists, and researchers interested in language contact.
