Sommario/riassunto	Personality pathology is rooted in early development and affects a wide range of affects, behaviours and cognitive processes. Every year thousands of articles about the etiology of personality pathology are published in various professional or scientific reviews. There is a growing distance between the generalist's practice and our increasingly precise scientific knowledge. However, no one can read everything and

therefore, it behoves us to ask ourselves the following questions: is the most recent better than what came before? Is the measurable and demonstrable necessarily clinically interestin
