Sommario/riassunto

The recent global financial crisis has caused massive upheavals worldwide. The papers in this volume analyze whether financial principles seem to have shifted in recent years, and what that may mean for international financial markets and regulation. What 'broke' in the current crisis? Is there no 'playbook' on how to respond to systemic crises? What is the optimal role of the state in dealing with crises? How should asset bubbles be addressed in the future? Do we need a major overhaul of governance in the industry? What means exist to address systemic crises? What reforms are needed? These an
