Sommario/riassunto	Many nurse practitioners and radiographer practitioners view paediatric trauma radiographs with a certain amount of trepidation. Rightly so - paediatric radiographs can be difficult to interpret, requiring additional learning and experience, but that is the challenge, and interest of paediatric trauma. The aim of this book is to assist with that professional development. There are 100 case studies each with radiograph image. The book is designed to support whatever course you have done whether reporting, 'red dotting' or commenting or to encourage you to go on 'that course'. It can be used as

Sommario/riassunto

Empathie ist zum Modethema avanciert. Besonders im Bereich des Designs und des Managements wird sie zunehmend als professionelle Strategie und gleichzeitig moralische Kompetenz positioniert. Macht Empathie durch Design unsere Arbeitswelt also zu einem besseren Ort? Und was heißt es, Empathie programmatisch im Unternehmen einzuführen? Eva Koppen zeigt die überraschenden Effekte auf, die mit der Einführung von Empathie-geleiteten Arbeitsweisen wie Design Thinking einhergehen. Nicht nur mehr Freiraume, auch Frust, Dissonanzen sowie neue Kontrollstrukturen und Disziplinierungsformen sind die Konsequenzen. Die Autorin denkt die beiden Traditionen der Arbeits- und Emotionssoziologie zusammen, um die Bedeutung von Empathie als eines hoch aktuellen und kontrovers diskutierten Konzepts zu untersuchen. Durch eine Interviewstudie in einem IT-Unternehmen wird offenbart, welche Folgen Empathie-Anforderungen für Mitarbeiter und die Organisation haben. Dabei wird das aktuelle, positiv aufgeladene Bild von Empathie kritisch hinterfragt und die ambivalente Komplexität des Konstrukts aufgezeigt.
