Sommario/riassunto	This book will be an important addition to the limited number of books that discuss finance and accounting issues in East Asian countries. While presenting recent empirical studies on finance and accounting in East Asian economies, it also reveals the underlying reasons for

remarkable economic growth and emerging performance of the financial markets in the East Asian countries. It introduces newly developed financial products, institutions, governance mechanism, banking policy changes and their implications in the East Asian economies, and discusses the way forward for these economies with rec

Sommario/riassunto

Presents topical research in the study of the symptoms, causes and treatments of varicose veins. This book discusses topics that include segmental failure of the vaso-regulatory function of venous microcirculation causing varicose veins; the role of inflammation in varicose vein pathology; diagnostic airplethysmography; and, more.
