Sommario/riassunto	"How women can make it to the top by adopting the new rules of leadership Women hold just 11 percent of the most senior-level leadership positions in U.S. Corporations--a number that hasn't changed in over 30 years. How can women break through? Break Your Own Rules distills the six faulty assumptions (or "rules") most women follow that get in the way--then delivers the correlating new rules that promise to clear that path. For example, the old rule of "Focus on Others" must be replaced by "Take Center Stage," "Hard Work Will Get You There" must yield to "Be Politically Savvy." "Play It Safe" must give way to "Play to Win." "Ask Permission" must be replaced by "Proceed Until Apprehended." Features the results of over 1,700 interviews with executives in Fortune 1000 companies, as well as the authors' new research and ongoing work with over 5,000 professional women Showcases previously-untold stories from high profile women including Ann Moore (CEO, Time Inc.), Susan Ivey (CEO, Reynolds American), Cathy Bessant (Global Executive for Technology and Operations for Bank of America), Lynn Ford (CEO, ING Solutions), and more Reveals what it really takes for any woman to succeed at the highest levels Foreword by Sharon Allen, Chairman of Deloitte This hands-on guide is for women who are ready to transform their assumptions and join the senior ranks of American business"--

Sommario/riassunto	This superb guide brings the work of Filippo Coarelli, one of the most widely published and well-known scholars of Roman topography, archeology and art, to a broad English-language audience. Conveniently organized by walking tours and illustrated throughout with clear maps, drawings, and plans, Rome and Environs: An Archaeological Guide covers all of the major, and an unparalleled number of minor, ancient sites in the city, and, unlike most other guides of Rome, includes major and many minor sites within easy reach

of the city, such as Ostia Antica, Palestrina, Tivoli, and the many areas of interest along the ancient Roman roads. An essential resource for tourists interested in a deeper understanding of Rome's classical remains, it is also the ideal book for students and scholars approaching the ancient history of one of the world's most fascinating cities. • Covers all the major sites including the Capitoline, the Roman Forum, the Imperial Fora, the Palatine Hill, the Valley of the Colosseum, the Esquiline, the Caelian, the Quirinal, and the Campus Martius. • Discusses important clusters of sites-one on the area surrounding Circus Maximus and the other in the vicinity of the Trastevere, including the Aventine and the Vatican. • Covers the history and development of the city walls and aqueducts. • Follows major highways leading outside of the city to important and fascinating sites in the periphery of Rome. • Features 189 maps, drawings, and diagrams, and an appendix on building materials and techniques. • Includes an updated and expanded bibliography for students and scholars of Ancient Rome.
