

1. Record Nr.	UNINA9910456722903321
Autore	Tsotsos John K
Titolo	A computational perspective on visual attention [[electronic resource] /] / John K. Tsotsos
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, c2011
ISBN	0-262-29514-8 1-283-25855-2 9786613258557 0-262-29542-3
Descrizione fisica	1 online resource (333 p.)
Disciplina	612.8/4
Soggetti	Vision Visual perception - Mathematical models Computer vision - Mathematical models Attention - Mathematical models Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Cover ; Contents; Preface; Acknowledgments; 1 Attention - We All Know What It Is; 2 Computational Foundations; 3 Theories and Models of Visual Attention; 4 Selective Tuning: Overview; 5 Selective Tuning: Formulation; 6 Attention, Recognition, and Binding; 7 Selective Tuning: Examples and Performance; 8 Explanations and Predictions; 9 Wrapping Up the Loose Ends; Appendix A: A Few Notes on Some Relevant Aspects of Complexity Theory; Appendix B: Proofs of the Complexity of Visual Match; Appendix C: The Representation of Visual Motion Processes; References; Author Index; Subject Index; Insert
Sommario/riassunto	The author offers a comprehensive, up-to-date overview of attention theories and models and a full description of the selective tuning model, confining the formal elements to two chapters and two appendixes.
