3.2 Default-remote entities 3.2.1 High-quality counterparties; 3.2.2 Special purpose vehicles; 3.2.3 Central counterparties; 3.3 Termination and walkaway features; 3.3.1 Termination events; 3.3.2 Additional termination events; 3.3.3 Walkaway features; 3.4 Netting and close-out; 3.4.1 Close-out; 3.4.2 Payment and close-out netting; 3.4.3 The need for close-out netting; 3.4.4 The birth of netting; 3.4.5 Netting agreements; 3.4.6 The ISDA Master Agreement; 3.4.7 Product coverage; 3.4.8 Netting and exposure; 3.4.9 Advantages and disadvantages of netting; 3.4.10 Multilateral netting
3.5 Netting and exposure

Sommario/riassunto

The first decade of the 21st Century has been disastrous for financial institutions, derivatives and risk management. Counterparty credit risk has become the key element of financial risk management, highlighted by the bankruptcy of the investment bank Lehman Brothers and failure of other high profile institutions such as Bear Sterns, AIG, Fannie Mae and Freddie Mac. The sudden realisation of extensive counterparty risks has severely compromised the health of global financial markets. Counterparty risk is now a key problem for all financial institutions. This book explains the emergence of c
