

1. Record Nr.	UNINA9910456724603321
Titolo	Mathematical understanding of infectious disease dynamics [[electronic resource]] / / editors Stefan Ma, Yingcun Xia
Pubbl/distr/stampa	New Jersey, : World Scientific, c2009
ISBN	1-282-44100-0 9786612441004 981-283-483-4
Descrizione fisica	1 online resource (240 p.)
Collana	Lecture notes series, , 1793-0758 ; ; v. 16
Altri autori (Persone)	MaStefan XiaYingcun
Disciplina	614.4015118
Soggetti	Communicable diseases - Epidemiology - Mathematical models Medicine Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	CONTENTS; Foreword; Preface; The Basic Epidemiology Models: Models, Expressions for R0, Parameter Estimation, and Applications Herbert W. Hethcote; Epidemiology Models with Variable Population Size Herbert W. Hethcote; Age-Structured Epidemiology Models and Expressions for R0 Herbert W. Hethcote; Clinical and Public Health Applications of Mathematical Models John W. Glasser; Non-identifiables and Invariant Quantities in Infectious Disease Models Ping Yan
Sommario/riassunto	The Institute for Mathematical Sciences at the National University of Singapore hosted a research program on Mathematical Modeling of Infectious Diseases: Dynamics and Control from 15 August to 9 October 2005. As part of the program, tutorials for graduate students and junior researchers were given by leading experts in the field.
