Sommario/riassunto	The status of civil rights in the United States today is as volatile an issue as ever, with many Americans wondering if new laws, implemented after the events of September 11, restrict more people

than they protect. How will efforts to eradicate racism, sexism, and xenophobia be affected by the measures our government takes in the name of protecting its citizens? Richard Delgado, one of the founding figures in the Critical Race Theory movement, addresses these problems with his latest book in the award-winning Rodrigo Chronicles. Employing the narrative device he and other Critical Race theorists made famous, Delgado assembles a cast of characters to discuss such urgent and timely topics as race, terrorism, hate speech, interracial relationships, freedom of speech, and new theories on civil rights stemming from the most recent war. In the course of this new narrative, Delgado provides analytical breakthroughs, offering new civil rights theories, new approaches to interracial romance and solidarity, and a fresh analysis of how whiteness and white privilege figure into the debate on affirmative action. The characters also discuss the black/white binary paradigm of race and show why it persists even at a time when the country's population is rapidly diversifying.

Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Introduction -- Foreign aid literature review -- Structure and management of China's foreign 'aid' and government-sponsored investment activities -- Worldwide scale, trends, and composition of China's FAGIA -- China's FAGIA in six regions and selected countries -- Inferences, insights, and related issues.
Sommario/riassunto	With the world's second largest economy, China has the capacity to engage in substantial programs of economic assistance and government-sponsored investments in 93 emerging-market countries. In the first decade of the 21st century, China has expanded and directed this capacity in these countries for both their benefit and for China's own benefit. Using several data sources and aggregation methods, RAND researchers built a large database, expanding upon prior Congressional Research Service data and enabling the programs to be more fully described and analyzed. Access to the database is available to interested readers who wish to request it from RAND. The RAND research assessed the scale, trends, and composition of these

programs in the emerging-market economies of six regions: Africa, Latin America, the Middle East, South Asia, Central Asia, and East Asia. Finally, the research derived inferences and insights from the analysis that may enhance understanding of the programs and policies pertaining to them. In general, China's use of foreign aid and government-sponsored investment activities has burgeoned in recent years, with emphasis on building infrastructure and increasing supplies of natural resources (including energy resources and ferrous and nonferrous minerals). Loans that include substantial subsidies provide financing for many of these programs, but the loans are accompanied by rigorous debt-servicing conditions that distinguish China's foreign aid from the grant financing that characterizes development aid provided by the United States and other nations of the Organization for Economic Cooperation and Development.
