Sommario/riassunto	It is a major challenge for linguists to explore the relations between referential choice and the discourse structure in dialogues, because,

unlike written modes of discourse, dialogue as an interactional mode of discourse needs careful treatment for linguistic analysis. This book investigates how discourse entities are linked with topic chaining and discourse coherence by showing that the choice and the distribution of referring expressions is correlated with center transition patterns in the centering framework. It provides original empirical research into the use of referring expressions in
