Nota di contenuto	Indhold: Research design -- The site and its environs -- A history of Mashkan-shapir and its role in the Kingdom of Larsa / Piotr Steinkeller -- Survey methods and analytic procedures -- Types and characteristics of surface features -- The objects -- A building inscription of Sin-iddinam and other inscribed materials from Abu Duwari / Piotr Steinkeller -- Locational data -- Distribution of features and objects in the urban environment
Sommario/riassunto	This volume describes and analyzes the survey work at the site of the ancient Mesopotamian city, Mashkan-shapir. A general description of the site and its environs is followed by the rationale for identifying the site as Mashkan-shapir. Specific details of the archaeological data are followed by analysis and a series of supplementary appendices.

Sommario/riassunto	This book sheds new light on the complex EU-Russia relationship, by providing a comprehensive account of the EU-Russia Energy dialogue. The author examines why Moscow and Brussels have failed to cooperate in this crucial area of interdependence. By invoking constructivism and Mikhail Bakhtin's concept of dialogue, and drawing on dozens of interviews with Russian and European officials, Talseth argues that the Energy Dialogue was unsuccessful because its interlocutors failed to come up with a common narrative for cooperation. Evidence suggests that the collapse of the Energy Dialogue was not pre-determined and initially there was a great deal of optimism and goodwill. Ultimately, the outcome of the Energy Dialogue was shaped by the unfolding time-space of Russo-European relations.

An invaluable reference for students and researchers interested in Russo-European politics, Russo-European energy politics, and energy politics in general. This book will also be of interest to International Relations-scholars focusing on theory and methodology, particularly constructivist research. .
