Soggetti	Psychoanalysis Cognitive neuroscience Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 139-150) and index.
Nota di contenuto	Cover; Copy Right; ACKNOWLEDGEMENTS; ABOUT THE AUTHOR; INTRODUCTION; CHAPTER ONE: The unconscious and the mysteries of human life; CHAPTER TWO: Historical context of the tension between the cognitive and the psychoanalytic unconscious; CHAPTER THREE: The mind and the unconscious of the post-Freudian era; CHAPTER FOUR: On the competencies of the neural unconscious; CHAPTER FIVE: Repression and becoming conscious of the repressed reframed: the four-level model; CHAPTER SIX: Psychotherapy, neuroscience, and the levels of explanation; Epilogue: history of the future of psychoanalysis; REFERENCES
Sommario/riassunto	The aim of Freudian Unconscious and Cognitive Neuroscience is to create a conception of the Freudian things around the unconscious that takes seriously both the clinical data gathered in the scope of psychoanalytic clinical practice during the past 110 years, and the empirical and theoretical achievements of cognitive science and evolutionary theory. Tensions between the psychoanalytic and other

views give a hint that the task is anything but easy.
