## Sommario/riassunto

The fifth and last volume in the 'Distortions to Agricultural Incentives' series focus on distortions to agricultural incentives from a global perspective. During the 1960's and 1970's most developing countries imposed anti-agricultural policies, while many high-income countries restricted agricultural imports and subsidized their farmers. Both sets of policies inhibited economic growth and poverty alleviation in developing countries. Since the 1980's, however, many developing countries began to reverse that policy trend. This book brings together the first-ever comprehensive and consistent set of...
