

1. Record Nr.	UNINA9910456953903321
Titolo	Multi-scale phenomena in complex fluids [[electronic resource]] : modeling, analysis and numerical simulation // editors, Thomas Y. Hou, Chun Liu, Jian-Guo Liu
Pubbl/distr/stampa	Beijing, : Higher Education Press [Hackensack], N.J., : World Scientific, c2009
ISBN	7-89423-624-1 1-282-44316-X 9786612443169 981-4273-26-0
Descrizione fisica	1 online resource (379 p.)
Collana	Series in contemporary applied mathematics ; ; 12
Altri autori (Persone)	HouThomas Y LiuChun LiuJian-Guo
Disciplina	532.00151
Soggetti	Fluid dynamics - Mathematics Complex fluids - Analysis Complex fluids - Mathematics Differential equations, Partial - Mathematical models Numerical analysis - Simulation methods Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preface; Contents; Zhaojun Bai, Wenbin Chen, Richard Scalettar, Ichitaro Yamazaki: Numerical Methods for Quantum Monte Carlo Simulations of the Hubbard Model; Albert C. Fannjiang: Introduction to Propagation, Time Reversal and Imaging in Random Media; Thomas Y. Hou: Multiscale Computations for Flow and Transport in Porous Media; Chun Liu: An Introduction of Elastic Complex Fluids: An Energetic Variational Approach; Qi Wang: Introduction to Kinetic Theory for Complex Fluids
Sommario/riassunto	Multi-Scale Phenomena in Complex Fluids is a collection of lecture notes delivered during the first two series of mini-courses from "Shanghai Summer School on Analysis and Numerics in Modern

Sciences", which was held in 2004 and 2006 at Fudan University, Shanghai, China. This review volume of 5 chapters, covering various fields in complex fluids, places emphasis on multi-scale modeling, analyses and simulations. It will be of special interest to researchers and graduate students who want to work in the field of complex fluids.
