Sommario/riassunto

Where the Waters Meet offers the reader a new way of viewing an old subject. So often psychology and counselling therapies have been, and still are, seen as competitors, or even enemies, vying for supremacy as the true religion. This book invites us to take a fresh look at these two fields, each with their own experience and dogma, and view them in a different light. We are introduced to complementarity, an approach through which vital common factors begin to break through the barriers of convention and jargon. This book is written from deeply held convictions about faith and about therapy and emerges from several decades of experience in ordained ministry, and of working as a psychodynamic counsellor. David Buckley is passionate about both the healing process of therapy and the life-giving inspiration of faith. He sees the two not as enemies but as intrinsically linked.
