The University of Newcastle / John Walker and John Spencer -- 16. The University of Nottingham /

Idris Williams -- 17. The University of Oxford / Godfrey Fowler -- 18. The University of Sheffield / David Hannay and Nigel Mathers -- 19. The University of Southampton / George Freeman, John Bain and Tony Kendrick -- 20. The London Medical Schools -- 21. The University of St Andrews / Cathy Jackson.

Sommario/riassunto

The first collective record of the evolution of general medical practice as an academic discipline over half a century. This anthology captures the stories of the early struggles to set up university departments between visionary supporters and traditionalist blockers as well as the steadily increasing successes aided by a dedicated funding system. The accounts are written where possible by the people involved in the early developments of their subject. These tales are of vision, commitment and resilience and are interesting both in their own right and for the more general lessons they tell us about the processes of creating institutional change within a modern democracy. * Demonstrates the radical shifts in the shape of medical education in the last two decades * Provides vivid personal accounts from early academic leaders * Includes comment on contemporary medical and educational developments.
