|-------------------------|---|
| 1. Record Nr. | UNINA9910457094503321 |
| Autore | Miftahof Roustem |
| Titolo | Mathematical modeling and simulation in enteric neurobiology [[electronic resource] /] / Roustem Miftahof, Hong Gil Nam, David Lionel Wingate |
| Pubbl/distr/stampa | Hackensack, NJ, : World Scientific, c2009 |
| ISBN | 1-282-44120-5 9786612441202 981-283-481-8 |
| Descrizione fisica | 1 online resource (350 p.) |
| Altri autori (Persone) | NamHong Gil WingateDavid L |
| Disciplina | 616.3 |
| Soggetti | Gastrointestinal system - Innervation - Mathematical models Gastrointestinal system - Innervation - Computer simulation Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references (p. 296-312) and index. |
| Nota di contenuto | Overview of enteric neurobiology -- Myoelectrical activity of the smooth muscle -- Pharmacology of myoelectrical activity -- Physicochemical basis of synaptic transmission -- Neuronal assemblies -- Multiple neurotransmission -- Functional unit -- Dynamics of intestinal propulsion. |
| Sommario/riassunto | The book recognizes the complexity of biological phenomena under investigation and treats the subject matter with a degree of mathematical rigor. Special attention is given to computer simulations for interpolation and extrapolation of electromechanical and chemoelectrical phenomena, nonlinear self-sustained electromechanical wave activity, pharmacological effects including co-localization and co-transmission by multiple neurotransmitters, receptor polymodality, and drug interactions. |
