Gerrymandering Georgia: A Case Study; Ch07. Looking to the Future; Notes; Index; About the Author
Sommario/riassunto	This book prepares readers for the redistricting of congressional, state legislative, and local collegial bodies. Chapters 2 through 5 cover the major factors that guide the adjustment of district lines to reflect population shifts. These chapters examine requirements for population equality, fair treatment of minorities, other elements such as compactness and respect for political boundaries and partisan considerations. The book concludes with a preview of the post-2010 redistricting.
