ISBN	0-429-91014-2 0-367-32997-2 0-429-48537-9 1-78241-144-5
Edizione	[First edition.]
Descrizione fisica	1 online resource (385 p.)
Collana	Tavistock Clinic series
Disciplina	155.4
Soggetti	Child development Observation (Psychology) Child psychology - Research - Methodology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (pages 335-350) and index.
Nota di contenuto	pt. 1. Developmental issues -- pt. 2. Observing in the home -- pt. 3. Observing in a nursery -- pt. 4. Applications -- pt. 5. Research.
Sommario/riassunto	Observing young children at play is an everyday and often fascinating and pleasurable experience for many of us. It also has a great pedigree in the development of psychoanalysis from Freud's observation of his grandson's game with the cotton-reel onwards. This book describes the practice of observing young children in home and nursery settings in a systematic and non-intrusive way in order to expand our understanding of their emotional, cognitive, and social development. It uses a psychoanalytic lens to enrich the meaning of what is seen. How do minds and personalities take shape? How can we train people to see what is most relevant in helping children to develop? The chapters range from classic papers by famous practitioners of an older generation to observations completed in recent years in the UK, Europe, and the US. Observation of this sort has also spread to Latin America, India, Australia, Africa, and the Far East. The differences and

continuities with Infant Observation are the starting point.

2. Record Nr.	UNINA9910457149803321
Autore	De Rosa Raffaella
Titolo	Descartes and the puzzle of sensory representation [[electronic resource] / / Raffaella De Rosa

Nota di contenuto	Contents; Preface; Acknowledgments; Abbreviations; Overview; 1. Descartes' Account of Ideas and the Puzzle of Sensory Representation; 2. Non-Representationalist Solutions: Cartesian Sensations as Qualia; 3. Externalist Solutions: Causal Accounts; 4. Externalist Solutions: Teleofunctional Accounts; 5. A Descriptivist-Causal Account and the Solution of the Puzzle of Sensory Representation; 6. Objections and Replies; Conclusion; References; Index
Sommario/riassunto	While much has been written on Descartes' theory of mind and ideas, no systematic study of his theory of sensory representation and misrepresentation is currently available in the literature. Descartes and the Puzzle of Sensory Misrepresentation is an ambitious attempt to fill this gap. It argues against the established view that Cartesian sensations are mere qualia by defending the view that they are representational; it offers a descriptivist-causal account of theirrepresentationality that is critical of, and differs from, all other

extant accounts (such as, for example, causal, teleofunctio
