Sommario/riassunto

Selected Topics in Nanoscience and Nanotechnology contains a collection of papers in the subfields of scanning probe microscopy, nanofabrication, functional nanoparticles and nanomaterials, molecular engineering and bionanotechnology. Written by experts in their respective fields, it is intended for a general scientific readership who may be non-specialists in these subjects, but who want a reasonably comprehensive introduction to them. This volume is also suitable as resource material for a senior undergraduate or introductory graduate course in nanoscience and nanotechnology.

Sommario/riassunto

"There is no use in rage. There is no use in screaming. There is no use in crying out and screaming 'this is unfair', just wait, cause no one cares." In a world of globalization and greed, of zero-hour contracts and The Big Bang Theory, violence worms its way into every aspect of

our lives. Following their debut show Nothing, multi award-winning young company Barrel Organ present Some People Talk About Violence. Expect people, or just ideas, in mindless frustration, on the edge of some kind of revolt.
