

1. Record Nr.	UNINA9910457186503321
Titolo	Darwinian heresies // edited by Abigail Lustig, Robert J. Richards, Michael Ruse [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2004
ISBN	1-107-14467-1 1-280-51599-6 9786610515998 0-511-21517-7 0-511-21696-3 0-511-21159-7 0-511-31563-5 0-511-51217-1 0-511-21336-0
Descrizione fisica	1 online resource (viii, 200 pages) : digital, PDF file(s)
Disciplina	576.8/09
Soggetti	Evolution (Biology) - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: Biologists on Crusade / Abigail Lustig -- Russian theoretical biology between heresy and orthodoxy: Georgii Shaposhnikov and his experiments on plant lice / Elena Aronova and Daniel Alexandrov -- The spectre of Darwinism: the popular image of Darwinism in early twentieth-century Britain / Peter J. Bowler -- Natural theology / Abigail Lustig -- Ironic heresy: how young-earth creationists came to embrace rapid microevolution by means of natural selection / Ronald L. Numbers -- If this be heresy: Haeckel's conversion to Darwinism / Robert J. Richards -- Adaptive landscapes and dynamic equilibrium: the Spencerian contribution to twentieth-century, American, evolutionary biology / Michael Ruse -- 'The ninth moral sin': the Lamarckism of W.M. Wheeler / Charlotte Sleight -- Contemporary Darwinism and religion / Mikael Stenmark.
Sommario/riassunto	In Darwinian Heresies, which was originally published in 2004,

prominent historians and philosophers of science trace the history of evolutionary thought, and challenge many of the assumptions that have built up over the years. Covering a wide range of issues starting in the eighteenth century, Darwinian Heresies brings us through the time of Charles Darwin and the Origin, and then through the twentieth century to the present. It is suggested that Darwin's true roots lie in Germany, not his native England, that Russian evolutionism is more significant than many are prepared to allow, and that the true influence on twentieth-century evolution biology was not Charles Darwin at all, but his often-despised contemporary, Herbert Spencer. The collection was intended to interest, to excite, to infuriate, and to stimulate further work.
