| 1. Record Nr. | UNINA9910457202003321 |
| Titolo | Nonsteady burning and combustion stability of solid propellants [[electronic resource] /] / edited by Luigi De Luca, Edward W. Price, Martin Summerfield |
| Pubbl/distr/stampa | Washington, D.C., : American Institute of Aeronautics and Astronautics, 1992 |
| ISBN | 1-60086-615-8 1-60086-396-5 |
| Descrizione fisica | 1 online resource (895 p.) |
| Collana | Progress in astronautics and aeronautics, , 0079-6050 ; ; v. 143 |
| Altri autori (Persone) | De LucaLuigi PriceEdward W SummerfieldMartin |
| Soggetti | Solid propellants - Combustion Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | ""Cover""; ""Title""; ""Copyright""; ""Preface""; ""Table of Contents""; ""Chapter 1. Solid Rocket Combustion Instabilitya€?An American Historical Accoun""; ""Chapter 2. Introduction to Nonsteady Burning and Combustion Stability""; ""Chapter 3. Steady Burning Rate and Affecting Factors:Experimental Results""; ""Chapter 4. Temperature Sensitivity of Solid Propellants and Affecting Factors:Experimental Results""; ""Chapter 5. Measuring Thermodynamic Properties of Burning Propellants""; ""Chapter 6. Thermophysics of Stable Combustion Waves of Solid Propellants"" ""Chapter 7. Flame Structure of Modern Solid Propellants""""Chapter 8. Nonintrusive Diagnostic Techniques for Research on Nonsteady Burning of Solid Propellants""; ""Chapter 9. L* Instability""; ""Chapter 10. Radiation-Driven Transient Burning: Experimental Results""; ""Chapter 11. Self-Sustained Oscillatory Burning of Solid Propellants: Experimental Results""; ""Chapter 12. Transient Combustion of Solid Propellants: An Important Aspect of Deflagration-to-Detonation Transition""; ""Chapter 13. Coupling Between Nonsteady Burning and Structural Mechanics of Solid-Propellant Grains"" |

""Chapter 14. Theory of Nonsteady Burning and Combustion Stability of Solid Propellants by Flame Models""""Chapter 15. Theory of Nonsteady Burning and Combustion Stability of Solid Propellants by the Zeldovich-Novozhilov Method""; ""Chapter 16. Numerical Computations of Solid-Propellant Nonsteady Burning in Open or Confined Volumes""; ""Chapter 17. Laboratory Test Methods for Combustion-Stability Properties of Solid Propellants""; ""Chapter 18. Prediction of the Stability of Unsteady Motions in Solid-Propellant Rocket Motors"" ""Chapter 19. Applications of Combustion-Stability Technology to Solid-Propellant Rocket Motors""""Chapter 20. Technologies and Techniques for Instability Suppression in Motors""; ""Chapter 21. Status and Prospects for Future Developments""; ""Author Index""
