1. Record Nr. UNINA9910457226003321

Titolo	Fusion energy in space propulsion [[electronic resource] /] / edited by Terry Kammash
Pubbl/distr/stampa	Washington, D.C., : American Institute of Aeronautics and Astronautics, c1995
ISBN	1-60086-635-2 1-60086-416-3
Descrizione fisica	1 online resource (263 p.)
Collana	Progress in astronautics and aeronautics ; ; v. 167
Altri autori (Persone)	KammashTerry
Disciplina	629.47/53
Soggetti	Nuclear fusion Space vehicles - Propulsion systems Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Cover""; ""Title""; ""Copyright""; ""Table of Contents""; ""Preface""; ""Principles of Fusion Energy Utilization in Space Propulsion""; ""High-Performance Fusion Rocket for Manned Space Missions""; ""An Antiprotpon Catalyzed Inertial Fusion Propulsion System""; ""Comparison of Fusion/Antiproton Propulsion Systems for Interplanetary Travel""; ""An Antiproton Driver for Internal Confinement Fusion Propulsion""; ""From SSTO to Saturn's Moons: Superperformance Fusion Propulsion for Practical Spaceflight"" ""Innovative Technology for an Inertial Electrostatic Confinement (IEC) Fusion Propulsion Unit""""""Fusion Plasma Thruster Using a Dense Plasma Focus Device""; ""Performance of Fusion-Fission Hybrid Nuclear Rocket Engine""; ""Magnetic Control of Fission Plasmas""; ""The Outer Solar System and the Human Future""; ""Author Index""
