Sommario/riassunto

Community-Based Health Interventions covers the skills necessary to change health in a community setting through the reduction of disease, disease conditions, and risks to health, as well as create a supportive environment for the maintenance of the behavior changes. The first section provides background information about why interventions in communities are important, the history of several major community interventions, ethical issues in the design and implementation of interventions and the different types of interventions. The second section covers planning and activities needed to complet
