

1. Record Nr.	UNINA9910457256203321
Titolo	Structural optimization [[electronic resource] ] : status and promise // edited by Manohar P. Kamat
Pubbl/distr/stampa	Washington, D.C., : American Institute of Aeronautics and Astronautics, Inc., 1993
ISBN	1-60086-623-9 1-60086-404-X
Descrizione fisica	1 online resource (886 p.)
Collana	Progress in astronautics and aeronautics, , 0079-6050 ; ; v. 150
Altri autori (Persone)	KamatManohar P
Soggetti	Structural optimization Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>           ""Cover""; ""Title""; ""Copyright""; ""Preface""; ""Table of Contents"";           ""Chapter 1. Introduction: Historical Perspective and Future Directions"";           ""Introduction""; ""History and Motivation""; ""Issues in Multidisciplinary Design Optimization"";           ""Statement and Solution of the Optimization Problem""; ""Future Directions""; ""References"";           ""Chapter 2. Fundamental Concepts of Optimum Design""; ""Nomenclature"";           ""Introduction""; ""Optimum Design Model""; ""Basic Definitions and Existence of Solution"";           ""Optimality Conditions""; ""Unconstrained Problem""; ""Constrained Problem""           ""Global Optimality""""Postoptimality Analysis""; ""Changes in Constraint Limit"";           ""Scaling of Cost Function""; ""Scaling of Constraint""; ""Duality in Nonlinear Programming"";           ""Problem with Equality Constraints""; ""Problem with Inequality Constraints""; ""Summary"";           ""References"";           ""Chapter 3. Mathematical Programming Methods for Constrained Optimization: Primal Methods"";           ""Introduction""; ""Basic Concepts""; ""Optimization Process""; ""Optimization Algorithms"";           ""Steepest Descent Method""; ""Conjugate Gradient Method""; ""Sequential Unconstrained Minimization Techniques""           ""Method of Feasible Directions""""Modified Method of Feasible Directions"";           ""Sequential Linear Programming Method""; ""Sequential Quadratic Programming"";           ""Approximate Structural Optimization         </p>

Problem"; "Examples"; "Portal Frame"; "18-Bar Truss";  
"Summary"; "References"; "Chapter 4. Function Approximations";  
"Introduction"; "Local Approximations"; "Approximations Based on  
Zeroth- and First-Order Function Information"; "Differential Equation-  
Based Approximation"; "Approximations Based on Higher-Order  
Function Information"; "Global Approximations"  
"Response Surface Approach"; "Neural Networks"; "Intermediate  
Variables and Response Quantities"; "Midrange Approximations";  
"Multipoint Approximations"; "Scaling or Local-Global  
Approximations"; "Concluding Remarks"; "References"; "Chapter 5.  
Sequential Linearization and Quadratic Programming Techniques";  
"Nomenclature"; "Introduction"; "Design Optimization Model";  
"Basic Concepts and Definitions"; "Constraint Status at a Design  
Point"; "Constraint Normalization"; "Potential Constraint Strategy";  
"Descent Function"; "Convergence of an Algorithm"  
"Good Algorithm: A Definition"; "Linearization of the Problem";  
"Sequential Linear Programming"; "Sequential Quadratic  
Programming: Linearization Method"; "Descent Function"; "Step Size  
Determination"; "CSD Algorithm"; "Observations on the CSD  
Algorithm"; "Use of Potential Set Strategy"; "Sequential Quadratic  
Programming: Quasi-Newton Methods"; "Derivation of Quadratic  
Programming Subproblem"; "Quasi-Newton Hessian Approximation";  
"SQP Algorithm"; "Descent Functions"; "Numerical Implementation  
Aspects"; "Applications of SQP"  
"Simultaneous Control and Design of a Structure: A Global Solution  
Using SQP"
