Sommario/riassunto

The papers in this volume address core areas in contemporary Arabic linguistics: syntax, phonology, and variation studies. The papers in the syntax sections address different topics from the perspective of the Minimalist Program (Chomsky 1995) and subsequent work. The topics in this section are adverbs and adjectives, resumptive pronouns, gapping and VP deletion, and the morphosyntax of reciprocals. The phonology section consists of a contribution on coarticulation effects of uvular(ized) segments, and of a paper on pharyngealization and uvularization within the framework of Optimality Theory.
