Sommario/riassunto	This collection of essays is concerned with the experiences children have within the supervised worlds they inhabit, as well as with architecture and landscape architecture. International examples of innovative childcare practice are illustrated together with the design processes which informed their development. The emphasis here is on new and experimental childcare projects which set-out to reassert the rights of children to participate in a complex multi-faceted world, which is no longer available to them, unless under adult supervision. Research supports in d

Sommario/riassunto	This book is among the first to address the issue of assessing the efficiency of sustainable development financing from a theoretical and methodical point of view. The innovative nature of research is expressed through the study of new phenomena in finance including

sustainable financial systems, sustainable finance, ESG risk and individual and institutional motivations of financial managers in the sustainability concept. The book aims to draw attention to the significant gap in the existing research. The concept of Sustainable Development, if placed in an economic category, requires a lot of attention, but seeing the cognitive category from the perspective of the discipline of finance, the latter is unsatisfactory, with questions remaining unanswered. At the same time, the rank problem, its strategic dimension and the amount of financial resources allocated and disbursed for the purposes of focusing around sustainable development, identification of financial phenomena accompanying this category is seen as a priority. Most measures financing Sustainable Development and measures of public spending efficiency are measures subject to rigor and rules due to their specificity, which means actions aimed at increasing efficiency are treated as a priority. This book will be of interest to leading representatives of academia, practitioners, executives, officials, and graduate students in economics, finance, management, statistics, law and political sciences.
