

1. Record Nr.	UNINA9910457318003321
Autore	Hsu Shi-Ling
Titolo	The case for a carbon tax [[electronic resource]] : getting past our hang-ups to effective climate policy // Shi-Ling Hsu
Pubbl/distr/stampa	Washington, D.C., : Island Press, c2011
ISBN	1-59726-533-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (248 p.)
Disciplina	363.738/746
Soggetti	Carbon taxes Climatic changes - Government policy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Climate change policy alternatives -- Ten arguments for a carbon tax -- Arguments against a carbon tax -- Carbon tax psychology -- Changing political fortunes? -- Conclusion.
Sommario/riassunto	There's a simple, straightforward way to cut carbon emissions and prevent the most disastrous effects of climate change-and we're rejecting it because of irrational political fears. That's the central argument of The Case for a Carbon Tax, a clear-eyed, sophisticated analysis of climate change policy. Shi-Ling Hsu examines the four major approaches to curbing CO2: cap-and-trade; command and control regulation; government subsidies of alternative energy; and carbon taxes. Weighing the economic, social, administrative, and political merits of each, he demonstrates why a tax is currently the most effective policy. Hsu does not claim that a tax is the perfect or only solution-but that unlike the alternatives, it can be implemented immediately and paired effectively with other approaches. In fact, the only real barrier is psychological. While politicians can present subsidies and cap-and-trade as "win-win" solutions, the costs of a tax are immediately apparent. Hsu deftly explores the social and political factors that prevent us from embracing this commonsense approach. And he shows why we must get past our hang-ups if we are to avert a global crisis. In fact, the only real barrier is psychological. While

politicians can present subsidies and cap-and-trade as "win-win" solutions, the costs of a tax are immediately apparent.
