

1. Record Nr.	UNINA9910457319603321
Autore	Cofer R. C
Titolo	Rapid system prototyping with FPGAs [[electronic resource] /] / by R.C. Cofer and Benjamin F. Harding
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier/Newnes, c2006
ISBN	1-280-64257-2 9786610642571 0-08-045737-1
Edizione	[1st edition]
Descrizione fisica	1 online resource (321 p.)
Collana	Embedded technology series
Altri autori (Persone)	Harding Benjamin F
Disciplina	621.381
Soggetti	Digital electronics - Computer-aided design Field programmable gate arrays Rapid prototyping Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Rapid System Prototyping with FPGAs; Contents; Acknowledgements; About the Authors; 1 Introduction; 2 FPGA Fundamentals; 3 Optimizing the Development Cycle; 4 System Engineering; 5 FPGA Device-Level Design Decisions; 6 Board-Level Design Decisions and Allocation; 7 Design Implementation; 8 Design Simulation; 9 Design Constraints and Optimization; 10 Configuration; 11 Board-Level Testing; 12 Advanced Topics Introduction; 13 Cores and Intellectual Property; 14 Embedded Processing Cores; 15 Digital Signal Processing; 16 Advanced Interconnect; 17 Bringing It All Together A Rapid System Prototyping Technical References B Design Phases; Abbreviations and Acronyms; Index
Sommario/riassunto	The push to move products to market as quickly and cheaply as possible is fiercer than ever, and accordingly, engineers are always looking for new ways to provide their companies with the edge over the competition. Field-Programmable Gate Arrays (FPGAs), which are faster, denser, and more cost-effective than traditional programmable logic devices (PLDs), are quickly becoming one of the most widespread tools that embedded engineers can utilize in order to gain that needed edge.

FPGAs are especially popular for prototyping designs, due to their superior speed and efficiency. This book ho
