Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Problems with how we think about U.S. civil-military relations -- A comparative approach to the analysis of civil-military relations -- The institutions of U.S. civil-military relations -- Defense reform: institutional and political impediments to effectiveness -- The scale and politics of contracting out security -- An assessment of the performance of private security contractors.
Sommario/riassunto	This book develops a new approach to the analysis of civil-military relations by focusing on the effectiveness of the armed forces in fulfilling roles & missions, and on their efficiency in terms of cost. The approach is applied to the United States using official documents and interviews with policy-makers. In addition to analyzing the impact of defense reform initiatives over the past thirty years, the book includes the recent phenomenon of "contracting-out" security that has resulted in greater numbers of contractors in Iraq and Afghanistan than uniformed military personnel. <BR
