Sommario/riassunto	Working for Cameroon state-owned Radio in the 1970's and '80's meant toeing the official line and learning not to sing out of tune. While the rather scanty private press that existed at the time was subject to prior censorship, a different kind of censorship - self-censorship prevailed at the Radio where topics for commentaries were vetted by the Minister of Information or his delegate. But for Anglophones working in a predominantly francophone environment, once topics were approved, the authorities could not be sure which direction commentaries were going to take as the journalists applied the tactics of 'bite and blow', sometimes giving full expression of their Anglo-Saxon spirit of debate and critical analysis as evidenced in this selection of commentaries from the Sunday morning commentary programme, "Cameroon Report" (now "Cameroon Calling") of the late 1970's up till 1986. It is a showcase of the irrepressible seed of freedom of expression that Anglophone journalists were imbued with and demonstrated at a time when subjects related to coups d'état, human rights and governance were considered taboo. It was and shall

remain the indelible input of the Anglophone character that has had a positive influence on Cameroon's media landscape.

Sommario/riassunto

Do states have the right to prevent potential immigrants from crossing their borders, or should people have the freedom to migrate and settle wherever they wish? Christopher Heath Wellman and Phillip Cole develop and defend opposing answers to this timely and important question. Appealing to the right to freedom of association, Wellman contends that legitimate states have broad discretion to exclude potential immigrants, even those who desperately seek to enter. Against this, Cole argues that the commitment to the moral equality of all human beings - which legitimate states can be expected to

Chapter 1: Introduction - Biodiversity Offsets: The European Perspective on No Net Loss of Biodiversity and Ecosystem Services -- Chapter 2: Introduction of a European Strategy on No Net Loss of Biodiversity -- Chapter 3: Principles of the Business and Biodiversity Offsets Programme -- Chapter 4: Austria -- Chapter 5: Belgium -- Chapter 6: The Czech Republic -- Chapter 7: France -- Chapter 8: Germany -- Chapter 9: Lithuania -- Chapter 10: Spain -- Chapter 11: The Netherlands -- Chapter 12: United Kingdom -- Chapter 13: Other EU Member States -- Chapter 14: Conclusions – Lessons from biodiversity offsetting experiences in Europe.

Sommario/riassunto

This book deals with the new concept of biodiversity offsets. The aim of offsetting schemes is to achieve no net loss or even net gain of biodiversity. Offsets obey a mitigation hierarchy and reflect the precautionary and polluter-pays principle in regard to project impacts. Readers gain insights into current debates on biodiversity policies, with top experts outlining theoretical principles and the latest research findings. At the same time the focus is on practical application and case studies. Today there is a lively international discussion among practitioners and scientists on the optimal legal framework, metrics and design of habitat banks to ensure the success of biodiversity offsets and to minimise the risks of failure or misuse. Contributing to the debate, this volume presents the activities and practices of biodiversity offsetting already implemented in Europe in selected EU member states, and the lessons that can be learnt from them. Readers may be surprised at how much experience already exists in these countries. A further aim of the book is to offer grounded insights on the road ahead, and foster a more intensive and fruitful discussion on how offsetting can be extended and improved upon, so that it becomes a key and effective component of Europe's biodiversity conservation policy framework.
