

1. Record Nr.	UNINA9910457408003321
Autore	Weller Milton Webster
Titolo	Freshwater marshes [[electronic resource]] : ecology and wildlife management // Milton W. Weller
Pubbl/distr/stampa	Minneapolis, : University of Minnesota Press, c1994
ISBN	0-8166-8574-6
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (181 p.)
Collana	Wildlife habitats ; ; v. 1
Disciplina	574.5/26325
Soggetti	Marsh ecology Freshwater ecology Wildlife management Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 137-148) and index.
Nota di contenuto	Contents; Preface; Acknowledgments; Chapter 1. Introduction; Chapter 2. Marsh Basins, Hydrology, and Diversity; Chapter 3. Marsh Substrate and Vegetation Structure; Chapter 4. The Marsh as a System; Chapter 5. Habitat and Behavior Patterns Among Marsh Wildlife; Chapter 6. Dominant Animals; Chapter 7. Habitat Dynamics; Chapter 8. Management and Restoration; Chapter 9. Marshes and People; Chapter 10. Marshes for the Future; Epilogue; Appendix A. Some Elementary Marsh Study Techniques; Appendix B. Marsh Management Techniques Appendix C. Scientific Names of Plants and Animals Mentioned in the TextAppendix D. Glossary of Terms Used in the Text; References; Index
Sommario/riassunto	In this updated third edition, Weller describes the components of the freshwater marsh-its annual and seasonal dynamics as affected by rainfall cycles and the plant and animal population's response to such changes. Weller discusses how such wetland areas are managed for wildlife populations and diversity, and how such processes can be used in wetland conservation and restoration. He considers the impact society has on wetlands and offers conservation goals for freshwater wetland complexes. Weller broadens the third edition to include an analysis of how prairie wetlands compare in water dynamic
