Sommario/riassunto	This monograph presents a general picture of the evolution of IE verbal systems within a coherent cognitive framework. The work encompasses all the language families of the IE phylum, from prehistory to present day languages.Inspired by the ideas of Roman Jakobson and Gustave Guillaume the authors relate tense and aspect to underlying cognitive processes, and show that verbal systems have a staged development of time representations (chronogenesis). They view linguistic change as systemic and trace the evolution of the earliest tense systems by (a) aspectual split and (b) aspectual merge
